Notice for price revision (price increase)

To Our Valued Customers,

We thank you very much for being our loyal customers.

As you know, due to the recent changes in global market, the prices of raw materials, energy such as electricity and gas, transportation costs, etc. are all rising without any end in sight.

We have been making continuous efforts to reduce costs for some time, but the current rise in various costs is beyond our ability to control.

Therefore, in order to commit to offering high quality product supplies and maintain our foundation for continuous development of future value-added products, we would like to request a price revision (price increase) and ask for your cooperation and understanding.

Regarding the specific price, a general price increase of about 15% will be implemented to the current conventional prices. For each individual pricing details, we would consult with you separately.

We apologize for the inconvenience and ask for your understanding and of the necessity that led to our request for price revision.

Thank you for your continued support.
